TruLink® 1-Port 60GHz WirelessHD® Kit

High definition wireless transmission between your television and your HDMI® components

The TruLink 1-Port 60GHz WirelessHD Kit enables high definition wireless transmission between your television and your HDMI components. Enjoy a true 1080p signal from your computer, Blu-ray™ player, set-top box, gaming console or other HDMI device to your HDMI enabled television. The 60Ghz transmission capability means greater flexibility in your home theater setup by allowing you to place the components up to 33 feet apart or possibly more depending on the environment*.

The TruLink 1-Port 60GHz WirelessHD Kit is ideal for situations where in-wall cabling is either not feasible (such as in plaster, brick or exterior walls) or not desired (such as in apartments or other rental properties). By offering true uncompressed video transmission, the TruLink WirelessHD Kit is a quick, convenient and reliable cable replacement. This plug-and-play solution requires no software, no drivers and no setup – simply connect the receiver with the HDMI component and instantly transmit content to your television.

CONVENIENT

- Supports wireless transmission up to 33ft/10M in-room (longer distances may be supported depending on the environment)*
- Plug-and-play solution means no drivers, software, or setup required
- Auto Power function will automatically turn off the attached component when the transmitter is turned off
- Transmitter and receiver each have on/off switch to conserve power when not in use
- Transmitter and receiver are wall-mountable*

CablesToGo®
Service Through Every Connection

RELIABLE

- WirelessHD 1.0 certified
- Meets Digital Transmission Content Protection (DTCP) protocol
- Compatible with other WiHD enabled consumer electronics bearing the logo
- Supports Deep Color, x.v.Color™, Dolby® True HD, and DTS-HD Master Audio
- FCC and CE approvals

HIGH PERFORMANCE

- 36 antenna array provides a strong wireless signal
- Data transfer rates of up to 4 Gbps
- Supports true uncompressed 1080p@60Hz resolutions
- Supports 7.1 channel surround sound

*Although performance characteristics may exceed stated distance limitations depending on the environment they are in, the following best practices are recommended to ensure optimal results.

The transmitter and receiver should:
- Face each other within the same room
- Be located within 33 feet each other
- Be placed at the same level; i.e. the transmitter should not be placed higher than the receiver
- Be located in open spaces; i.e. not in a cabinet or enclosed shelf
